DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19 & 29-50, drawn to a fuel cell gasket, classified in class 429, subclass 38.
- II. Claims 20-28, drawn to a method of making a fuel cell gasket, classified in class 420, subclass 35.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product can be made by another and materially different process such as injection molding.

A telephone call was made to Michael Tucker on March 17, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
